START OF SECTION 2.0.0.0.0

1.0 GENERAL

1.1. Description of Work

1. Login with social media accounts does not work -the buttons are inactive and cannot be clicked.
 2. When you register and correctly fill the forms, and press sign up, nothing happens, the app just stays on the same screen, without giving any confirmation if registration is successful or not.
- However, pressing the sign in button again tells me that the email is already in use, so it looks as if I have registered.

1.2. Related Sections

1. Login with social media accounts does not work -the buttons are inactive and cannot be clicked.
 2. When you register and correctly fill the forms, and press sign up, nothing happens, the app just stays on the same screen, without giving any confirmation if registration is successful or not.
- However, pressing the sign in button again tells me that the email is already in use, so it looks as if I have registered.
